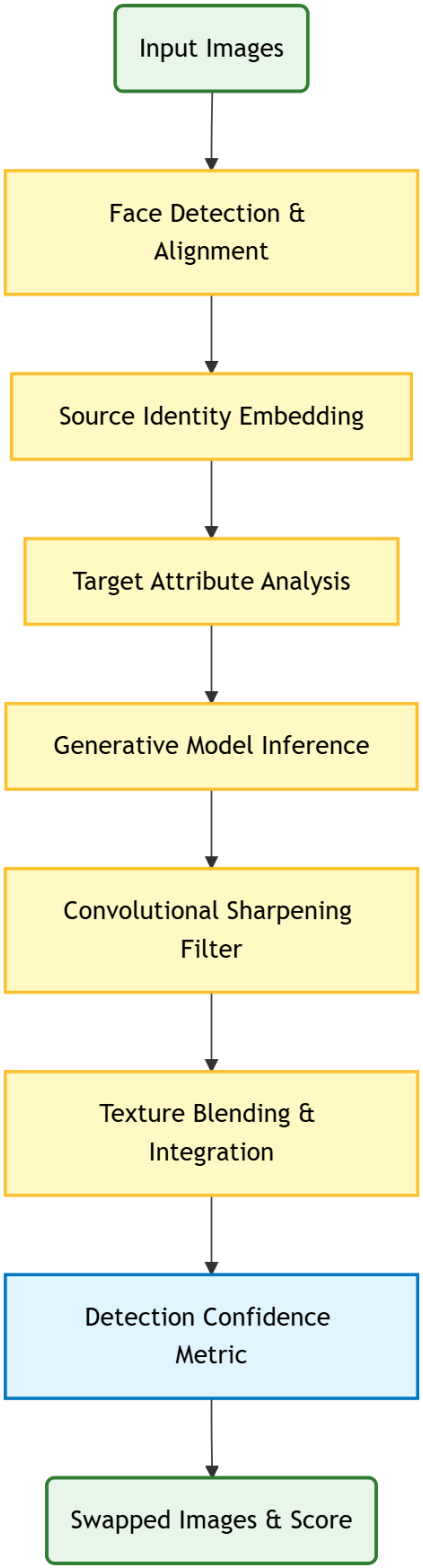
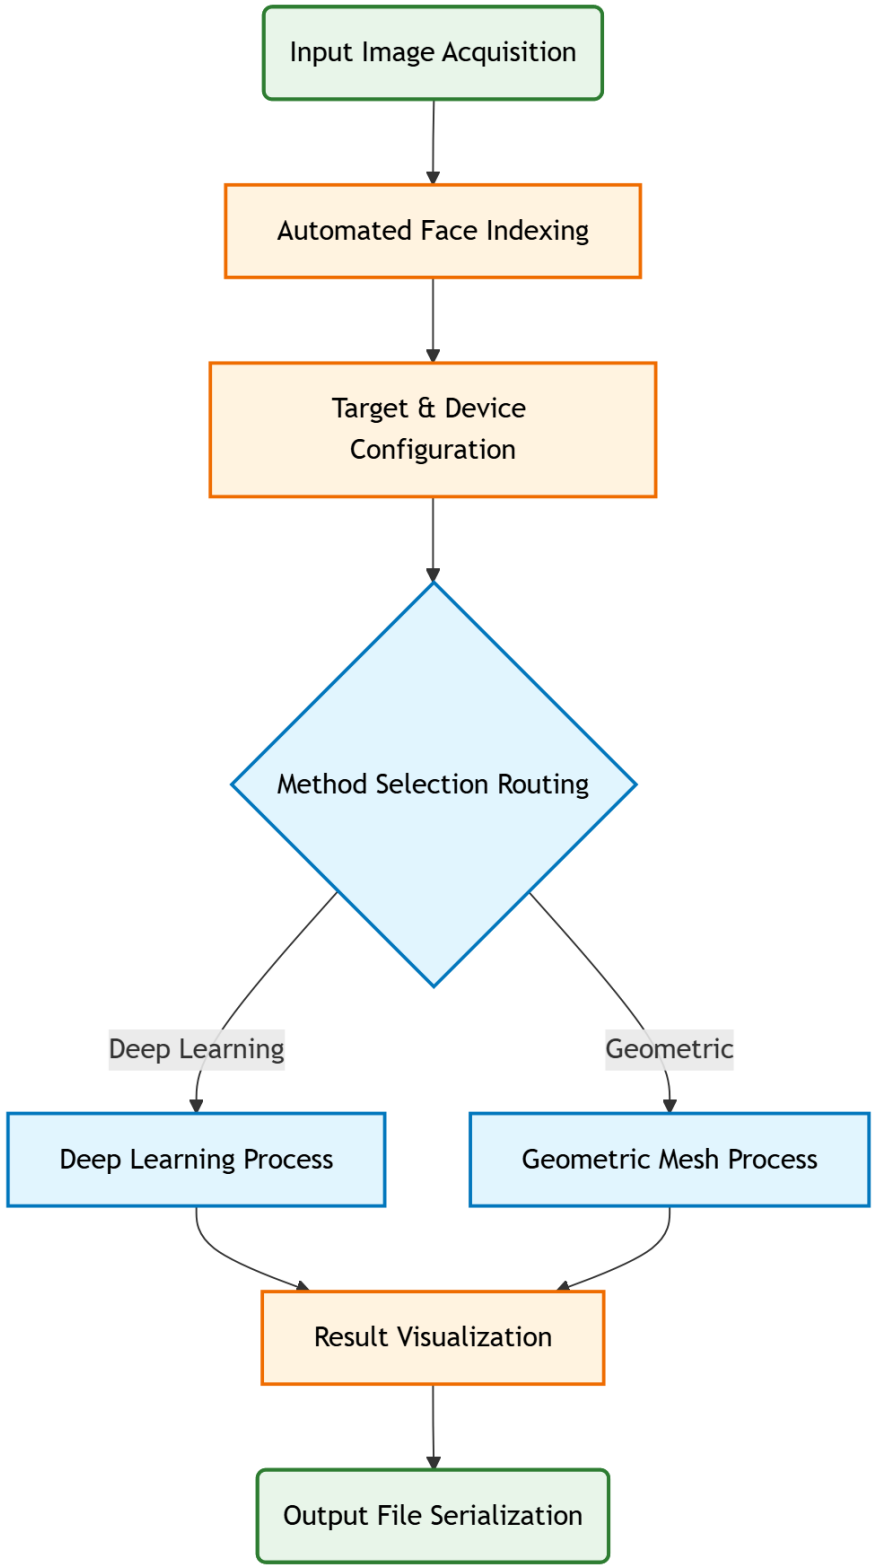
Input Images
Facial Landmark Detection
Triangular Mesh Generation
Transformation Matrix Calculation
Triangle Texture Warping
Facial Mask Generation
Color & Lighting Blending
Landmark Deviation Analysis
Face Scale Normalization
Accuracy Ratio Derivation
Swapped Images & Score



Input Images
Face Detection & Alignment
Source Identity Embedding
Target Attribute Analysis
Generative Model Inference
Convolutional Sharpening Filter
Texture Blending & Integration
Detection Confidence Metric
Swapped Images & Score



Input Image Acquisition
Automated Face Indexing
Target & Device Configuration
Method Selection Routing
Deep Learning
Geometric
Deep Learning Process
Geometric Mesh Process
Result Visualization
Output File Serialization
